The West Weald Landscape Project works to conserve and enhance the special natural environment of an extensive area (about 60,000 acres) through a co-ordinated approach to management for wildlife, quality of the environment and use and appreciation by people. Wisborough Green is within the area and I am sure that most of us appreciate the beauty of the countryside around us, but I wonder how many of us know that the area is an internationally important natural environment. Rich Howorth is passionate about the project, and his enthusiasm and knowledge will be apparent in his presentation. A fascinating insight into the area in which we live.

Followed by refreshments
All are most welcome to attend
