APPENDIX 4: SOUTH DOWNS NATIONAL PARK CONTEXT

English National Parks and the Broads UK Government Vision and Circular 2010 The National Parks and Access to the Countryside Act 1949 enabled the creation OF National Parks and sets out the statutory Purposes of all National Parks. The Environment Act 1995 added a duty for all National Parks. The Purposes and Duty are as follows:

Purpose 1: To conserve and enhance the natural beauty, wildlife and cultural heritage of the area.

Purpose 2: To promote opportunities for the understanding and enjoyment of the special qualities of the area;

Duty: In pursuing the two purposes above, the authority shall seek to foster the economic and social well-being of local communities within the National Park.

The Government published a new Vision and Circular (2010) containing guidance for National Parks. It details the responsibility of National Park Authorities to adapt to and mitigate against the impacts of climate change, and to lead the way as an exemplar of how to live within environmental limits.

SDNP Context:

Special Qualities:

Each National Park is unique. They have different landscapes, comm-unities and support a huge variety of wildlife. Extensive work was done to draw out what is unique and previous about the SDNP.

1. Diverse, inspirational landscapes and breathtaking views
2. A rich variety of wildlife and habitats including rare and internationally important species
3. Tranquil and unspoilt places
4. An environment shaped by centuries of farming and embracing new enterprise
5. Great opportunities for recreational activities and learning experiences
6. Well-conserved historical features and a rich cultural heritage
7. Distinctive towns and villages, and communities with real pride in their area

APPENDIX 5: SOME RARE & INTERESTING PLANTS OF WISBOROUGH GREEN

Scientific name	Common name	Notes
<i>Alchemilla filicaulis</i> ssp. <i>vestita</i>	a Lady's-mantle	Has always been rare in SE England. Occurs in old grassland in two fields near the Mens - the only Sussex sites.
<i>Carex elongata</i>	Elongated Sedge	Scarce in UK. Margin of an Arun backwater. The only Sussex site.
<i>Carex vulpina</i>	Fox Sedge	RDB: VU. Bank of R. Arun. Now in Sussex only in the Arun valley.
<i>Chamaemelum nobile</i>	Chamomile	RDB: VU. Pasture species requiring very short turf. Now survives in Sussex almost entirely on well-mown cricket pitches, including on WG village green.
<i>Daphne mezereum</i>	Mezereon	RDB: VU. Always very rare in Sussex and now virtually extinct, but was known from a copse near the Mens until a few years ago.
<i>Epipactis</i>	Violet Helleborine	Not rare, but becoming scarce in Sussex. Occurs in
<i>Genista tinctoria</i>	Dyer's Greenweed	Formerly a frequent grassland species, but now uncommon. Still occurs in a few fields in WG.
<i>Hypericum maculatum</i>	Imperforate St John's-wort	Not rare, but uncommon in Sussex. Remarkably large populations in a few fields near the Mens.
<i>Leersia oryzoides</i>	Cut-grass	RDB: EN. Bank of R. Arun - several sites. Almost the entire UK population now occurs in Sussex in the Arun catchment, especially on Amberley Wild Brooks and along the Arun banks.
<i>Myosurus minimus</i>	Mousetail	RDB: VU. Uncommon species of arable and poached ground. A fine population in arable south of the village.
<i>Oenanthe</i>	Narrow-leaved Water-	RDB: NT. Damp meadows near the Arun.
<i>Ophioglossum vulgatum</i>	Adder's-tongue	Not rare but becoming scarcer in grassland and open woodlands. In WG churchyard & a few other sites in the parish.
<i>Orchis morio</i>	Green-winged Orchid	RDB: NT. Once fairly frequent but becoming scarce in old grassland. In WG churchyard.
<i>Platanthera bifolia</i>	Lesser Butterfly-orchid	RDB: VU. Becoming rare in Sussex & elsewhere. Occurs sporadically in scrubby grassland and woodland near the Mens.
<i>Platanthera</i>	Greater Butterfly-orchid	RDB: NT. Not rare, but always of interest. In
<i>Polygonatum multiflorum</i>	Solomon's-seal	An ancient woodland species (distinct from the superficially similar hybrid grown in gardens) found in chalky woodland on the Downs. Interesting that it occurs occasionally in the Weald, where it indicates the presence of Paludina limestone beneath. In a copse near the Mens.
<i>Potamogeton x salicifolius</i>	a hybrid pondweed	= <i>P. lucens</i> (Shining Pondweed) x <i>P. perfoliatus</i> (Perfoliate Pondweed). In the Wey & Arun Canal. Very rare in the UK, and only Sussex site.

APPENDIX 8: IMPORTANT OPEN SPACES

IOS1 - Grass Verge adjacent to A272 below Church and extending east along the A272 (Billingshurst Road): These verges create an important open area when entering the village from the east, allowing extensive view from the Church as well as providing a visual profusion of wild flowers in spring. The open aspect contributes to a pleasant street scene. Owned and managed by WSCC.

IOS2 - Grass Verge adjacent to A272, north of the allotment site: In association with the verges detailed above, this verge also contributes to the open aspect and pleasant street scene when entering Wisborough Green, reinforcing the rural nature and character of the village.

IOS3 - Grass Verges at top of Harsfold Lane: The wide grass verges at the top of Harsfold Lane are an example of the open green areas so characteristic of Wisborough Green. Not only do these areas have a wealth of wildflowers, which have been encouraged with late summer mowing only, but has a historical connection to the village. Running along the fence line to the west is a York stone path, now sunken and overgrown by the verge. Historical records indicate that this was the middle section of a path from the Church known as 'Holy Water Lane', and used to collect water from the River Kird. Limited car parking provision has also been provided on the west side for allotment holders, those using the Scout Hut and walkers. Ownership of this top section of Harsfold Lane and therefore the verges is unknown, but the verges are managed by the Parish Council.
