COMMUNITY INFRASTRUCTURE LEVY – WISBORUGH GREEN PARISH INFRASTRUCTURE REQUIREMENTS
SUBMITTED TO CHICHESTER DISTRICT COUNCIL APRIL 2014
DETAILS HAVE BEEN INCLUDED IN THE COMMUNITY ACTION PLAN – AT THE TIME OF SUBMISSION, PHASING AND COST IMPLICATIONS UNKNOWN

Infrastructure Categories: Transport, Education, Health, Social (community facilities), Green Infrastructure, Public & community services, Utility Services

Infrastructure Category	**Scheme (Suggestion)**	**Justification/Rationale**	**Phasing (When)**	**Total Estimated Cost**	**Funding Sources**	**Delivery Lead (Who/How)**
Transport	A272 south of village – safe crossing point/re-alignment of carriageway	Increase pedestrian safety and reduce traffic speeds to achieve speed limit speeds.				
	School drop off facility and widen Newpound Lane to accommodate at front of school	Safety of children				
	Village parking area	Reduce congestion and increase road safety around village centre				
	Extend parking around The Green	Reduce congestion and increase road safety around village centre				
	B2133 – roundabout at Newpound Lane or pedestrian refuge in road	Speed reduction and therefore road safety improvement. Visibility restricted at junction when leaving Newpound Lane.				
	Provide traffic control measure to reduce speed in and out of village on A272	Speed reduction and therefore road safety improvement				
	Speed reduction measures on estates.	Speed reduction and therefore road safety improvement				
	Improve pedestrian safety on residential side of Kirdford Road – provide pavement/speed limit 30 mph	Speed reduction and therefore road safety improvement				

	Investigate re-use of existing garaging and verges in Butts Meadow to explore possible increase in practical parking.	Local concerns re parking issues and congestion/dangerous parking – lack of parking and blocked pavements for pedestrians – road safety				
Health	Extend GP surgery for those with travelling difficulty – lack of public transport	Improve health and independence for elderly patients				
Utility Services	Improvement in sewerage system - inadequate	Issues/over flowing sewers at Moonsbrook Cottage, Newpound Lane				
	Improvements to current provision or backup generators to increase reliability of electricity supply.	Improve sustainability of community				
	Remove BT ducts currently blocking gully in Newpound Lane.	Road currently floods on blind corner. Although ditch has been cleared, ducts block gully and hinders water flow.				
Social Infrastructure	Community Sports Facility	Community social and health improvements Current sports pavilion inadequate – needs updating				
	Reserve Football Pitch	Reduce pressure on the only current pitch – release the amenity of the Green for others				
Public / Community Facilities	Village Hall improvements/modernisation or replace – update to make community conference centre. Hall used by local organisations, but limited by facilities – no broadband, inflexible set up, basic toilet provision – therefore not appealing for corporate use.	A better facility, totally DDA compliant, great safety features and more flexibility. Attract corporate and other users. Increased trade for local businesses. Could include more sustainable features – solar panels – reduced running costs.				

	Possible glaze outside porch to create lobby area.					

	Village Hall – reinstate 3rd floor to provide a local history display and tourist information area. (Telephone Kiosk an option for Tourist info!)	Currently nowhere to display local history. WG is a popular area to visit, Gateway to South Downs National Park and could promote this further for the community's benefit.				
	Upgrade Public Toilets to make fully inclusive.	Currently dated and basic provision; not DDA compliant and o baby change facilities.				

Other Ideas

- Printed 'Welcome to New Residents' information booklet including details of all organisations and activities
- Printed information leaflet for visitors
- Printed self guided tour of WG centre – information leaflet, map on village green, points of interest highlighted
- Local walks in Parish booklet – highlighting points and areas of interest
- Preserve and maintain existing views/vistas valued by residents – trees grow!
- Improve maintenance of gullies for road drainage
- Tree Action Group – to monitor trees in Parish (not Green) and report concerns/remove ivy (landowners' permission required).
- Ditch/stream survey – followed by volunteer group to maintain/improve waterways (landowners' permission required).
- Reinstate and maintain verges where eroded ie, Newpound Lane.
- Encourage local energy generation including communal scheme
- Communal composting scheme
- Once a year meeting for village organisations to update, share issues, consider way forward – encourage community cohesion!
