

Ecological Data Search SxBRC/20/077 - Summary Report

An ecological data search was carried out for land at Wisborough Green Parish on behalf of Jill Sutcliffe (Wisborough Green Parish Neighbourhood Plan working group) on 26/05/2020.

The following datasets were consulted for this report:

	Requested	Radius/buffer size
Designated sites, habitats & ownership maps	Yes	Site only
Protected, designated and invasive species	Yes	Site only

Summary of results

Sites and habitats

Statutory sites	1 SAC / 2 SSSIs / 1 National Park
Non-statutory sites	6 LWS / 1 Designated Road Verge
Section 41 habitats	4 habitats
Ancient and/or ghyll woodland	Present

Protected and designated species

International designations	35 species	478 records
National designations	135 species	3,189 records
Other designations	325 species	5,279 records
Total	338 species	5,599 records
Invasive non-native	30 species	296 records

The report is compiled using data held by Sussex Biodiversity Record Centre (SxBRC) at the time of the request. SxBRC does not hold comprehensive species data for all areas. Even where data are held, a lack of records for a species in a defined geographical area does not necessarily mean that the species does not occur there – the area may simply not have been surveyed.

**This summary page may be published.
The full report and maps may not be published or otherwise shared.**

The data search report is valid until 26/05/2021 for the site named above.
